

REBELS FIGHTING AMONG THEMSELVES

**Dr. Sun Yat Sen Takes Flight
From China on Board
Japanese Vessel.**

SHANGHAI, Aug. 6.—A desperate fight among the rebels themselves occurred today at the Wu-Sung forts. The famous rebel regiment called "Dare to Die," whose commander, Lu-Fu-Piao, was suspected of having plotted to capture the fortifications in order to sell them to the government, attacked the forts this afternoon. The forces opened fire upon the attackers and simultaneously the northern troops executed a flanking movement, opening a fire which literally mowed down the "Dare to Die."

PEKIN, Aug. 6.—Dr. Sun Yat Sen, former provisional president of the republic, but now one of the leaders in the southern revolution, has fled the country on board a Japanese steamer bound for Formosa, an island belonging to Japan in the China sea off the province of Fu-Kien.

NANKING, Aug. 6.—A dispatch received here from the province of Kiang-Si says that the northerners have gained two decisive victories over the rebels and that the road to Nan-Chang now is virtually open.

"BRANDING STUNT" FATAL IN TWO CASES

BIRMINGHAM, Ala., Aug. 6.—The magnetic used in the initiation of Christopher Gustin and Donald Keno into the local lodge of the Loyal Order of Moose in administering the "branding stunt," as a result of which these two candidates died, was capable of generating 300 volts of electricity, enough to kill a man, according to testimony today at the inquest. Mat Stratford, an electrician, who sold the magnets, made the statement. He declared that the "electrical initiation" was crude cruelty.

MIDLAND TRAIL MAY GO THROUGH VERNAL

**Indiana Auto Party Declares
Route by Way of Grand
Junction Impossible.**

DENVER, Colo., Aug. 6.—Commissioner Ehrhart says that the Midland trail from Grand Junction through central Utah to Salt Lake City was declared to be impossible by the Indiana auto party.

"Those who have been over this road say that it passes through a desolate and uninviting country," said Ehrhart. "There are several bad grades, and sudden violent rains make the road almost impassable at times. We are considering the diversion of the Midland trail through northwestern Colorado to pass through Vernal, Utah, and the Ashley valley. By following the Duchesne river the road would pass through one of the finest valleys in the west, and this is certainly the natural route to take to Salt Lake City."

"To reach this road the trail will have to be diverted either at Rifle or Kremmling. It will miss Grand Junction, which is greatly to be regretted. The road west from Grand Junction to Salt Lake City seems to be impossible, however, and we are communicating with the Utah commission to see what can be done toward maintaining the Vernal road."

CHARITY INQUIRY IS PROPOSED IN CHICAGO

CHICAGO, Aug. 6.—A permanent organization to investigate and give publicity to organized charities in this city was formed here today. The prime purpose of the organization is to demonstrate how the \$100,000 given annually in charity here is expended.

What they spend money for, how they spend it, upon whom it is spent, what the need is for expenditure and what would be the result if none was spent, all come within the scope of the investigations of the new organization.

"GEORGE CARTER" IS MYTH, OR MISSING

**Man Who Signed "No Funds"
Check Is Believed to Be
Thief.**

Special to The Tribune.
OGDEN, Aug. 6.—Fearing that a stranger who gave his name as George Carter may have planned to repeat the trick of Joseph Marcan in cashing several forged checks bearing the names of a well-known business firm, Henry Williams, manager of the Utah & Oregon Lumber company, has issued a warning to banks and business houses not to cash checks bearing the firm's name without first conferring with him. Mr. Williams discovered today that twelve blank checks bearing the firm's name were missing from the company's check book and believes that the man giving his name as Carter stole the blanks.

Carter's method, according to the lumber company's manager, was not so different from that of Marcan, who cashed three checks for \$25 each after stealing the blanks from the livery office of Nelson & Fell. On Monday Carter ordered a bill of lumber amounting to \$63.68 and directed that it be delivered to 222 Adams avenue. Upon Carter's request, Manager Williams tendered him a blank personal check which the stranger filled in for the amount of his purchase and signed. The drawer from which the manager secured the check also contained the check book of the firm.

Before receiving the check from Carter, Manager Williams was called from the office for a few minutes and it is believed that during this time the stranger obtained twelve blank checks. They are Nos. 99, 92, 93, 95, 96, 98, 99, 101, 102, 104, 105 and 108. The investigation which revealed the loss of the blanks was not made until Carter's check for \$63.68 was returned from the bank with the statement "no funds." Inquiry at other banks of the city revealed that George Carter was not known.

After notifying banks regarding the loss of the blank checks, Manager Williams ascertained that no person by the name of Carter was known at 222 Adams avenue. The lumber had not yet been delivered. The lumber company manager is surprised that the man did not flood the city with bogus checks yesterday.

PROTECTED BY YOUTH.

**Young Man Accused by Fire Chief
Subject of Juvenile Court.**

Special to The Tribune.

OGDEN, Aug. 6.—Because the boy is not yet 18 years of age, the case of Glen McFate, charged by Fire Chief A. B. Canfield with interfering with the progress of the motor fire apparatus, has been referred to the juvenile authorities. A definite action on the complaint was not taken today.

Chief Canfield has informed the police and juvenile officers that he will continue to insist upon the arrest of all youthful drivers of motor vehicles who derive joy from entering into a race with the fire auto, whenever an alarm is sounded. As in the case of McFate, who was driving a motor truck yesterday, they often obstruct the streets and avenues in such a way as to hinder the progress of the equipment.

According to the fire department head, the drivers regard it as something of a distinction whenever they can drive their auto or motorcycle at a speed equal to that of the firemen. Often they are able to do so because the fire department drivers, fearing an accident, will not attempt to pass the obstructing vehicles.
